

# Information for Primary 5M Parents.

This sheet provides you with information about what your child will be learning this term, and shows next steps in their learning. We would encourage you to talk about this with your child, and where possible, to assist them with their learning at home.

## Maths & Numeracy

During our daily C.L.I.N.T. maths sessions we will partition numbers to multiply and divide two digit numbers and we will also begin to learn the seven times table. Every Monday we will complete a C.L.I.N.T. maths sheet to show our understanding and every Friday we will try our 'Big Maths, Beat That' challenge to show how much quicker we are getting at recalling simple addition and multiplication facts.

Red Group - looking at function machines and different ways to collate data.

Green Group - looking at finding fractions of a number and multiplication and division.

Blue Group - looking at subtraction with exchanging and multiplication

With Mrs McSheffrey - looking at symmetry and drawing and naming parts of a circle.

## Language & Literacy

Spelling - every Monday we are introduced to our spelling words and work on activities from our spelling textbook. On a Thursday night we should revise our spelling words in preparation for our spelling test on Friday. Spelling lists can all be found on our Microsoft Teams page.

Reading - We will be looking at Bloom's Taxonomy and creating different types of questions. We will be creating and answering remembering, understanding, applying and V.C.O.P. questions. We will also use S.R.A. to develop our individual reading comprehension skills.

Writing - We will be looking at different examples of functional writing. We will create a revolting recipe for a disgusting snack and write up one of our water experiments in the format of a science report.

## Other Class Information

Our topic this term is Water. We will learn about the water cycle and carry out different experiments to investigate the properties of water. We will make water wheels and discuss renewable energy and look at ways of cleaning water. We will also make an instructional video to explain the process of the water cycle. In R.M.E. we will learn about Saints and in Health and Wellbeing we are looking at the topic of resilience. We have P.E., weather permitting, twice a week so please remember your gym kit.
